PRIVATE MARKETING AUDIT

Confidential · 2026-08-13

Cedar Ridge Heating and Cooling

<https://cedarridgehvac.example> · Hatboro, PA

Audit aud_f99a421a46c5451fab1386502f04cabf · Score radar-v2.0.0

Executive summary

This audit measured the public homepage for Cedar Ridge Heating and Cooling. Site Quality Score is 41. The highest eligible offer is **rebuild**, not simply the highest raw score.

Rebuild is only on the table when a hard fault is proven. Strong verified websites are not offered a redesign.

Opportunity scorecard

Site Quality Score	41
Opportunity Score	51
Rebuild opportunity	82
SEO / AEO opportunity	66
Local opportunity	80
Paid opportunity	23
Conversion opportunity	50

Market fit	94
Contactability	75
Audit confidence	94
Priority	48

Each score stores components and explanations in the snapshot. Review volume is a fit signal, not proof of budget.

Website and technical SEO

Homepage HTML does not include a viewport meta tag.

measured · confidence 95% · high

A missing viewport is a provable hard fault and a rebuild-eligible defect.

[Add a responsive viewport and a mobile-first layout, or replace the site.](#)

Page weight and response time come from the HTTP fetch used in this audit.

measured · confidence 70% · info

Weight and response time affect both users and crawlers.

[Reduce blocking assets and compress images if the transfer is large.](#)

Search architecture and on-page SEO

On-page title and description were taken from the homepage HTML.

measured · confidence 90% · medium

On-page fields are the baseline a search engine is given.

Write a unique title and meta description that name the service and city.

Conversion and trust

Contact routes were taken from the business homepage markup.

observed · confidence 80% · medium

If the next step is buried, paid traffic and SEO both leak.

Put one primary call and form path above the fold.

Content and AI / AEO readiness

No live ChatGPT, Perplexity, or Google AI Overview ranking was measured.

observed · confidence 70% · medium

Answer engines need entity clarity, schema, and crawlable copy.

Add LocalBusiness schema, a direct-answer block, and an expert/author identity.

Prioritized 90-day roadmap

Recommended next service: rebuild.

recommendation · confidence 94% · info

The selected offer is the highest eligible route, not the highest raw score.

Complete the 90-day sequence in the report only where evidence exists.

1. Fix proven hard faults or confirm the site is strong enough to keep.

2. Close the highest eligible offer: rebuild.
3. Only then consider paid media, and only if the site can hold the click.

Sources, limitations and next step

- No ranking, traffic, ad spend, conversion volume, or AI-engine visibility is claimed unless a configured provider measured it and the evidence is stored.
- Private analytics/CMS access required for those metrics.
- Review volume is a fit signal, not proof of budget.

Private analytics/CMS access required before any traffic, conversion, or spend claim.
