Meta closeout and organic search transition

REPORT STATUS

Historical July Meta activity verified; handoff and AEO/GEO/SEO transition active

JULY SIGNAL

July closed the active paid-social chapter with a clear six-lead campaign signal, while the ongoing growth lane moved toward AEO, GEO, and SEO coordinated with the existing organic program.

Meta spend**\$478.14**

Through Jul 25 source

Meta impressions**10,563**

Two campaigns with delivery

Lead-form results**6**

Whole-integer native count

Primary CPL**\$56.75**

Six-lead campaign

What moved in July

VERIFIED WORK

- Verified Meta lead routing, recovered lead delivery evidence, and rechecked July lead dispositions.
- Reviewed the leading campaign: \$340.48 spend, 8,310 impressions, and six lead forms at a reported \$56.75 CPL.
- Prepared the AEO/GEO/SEO transition plan around service pages, homeowner FAQs, local painting topics, and internal links.
- Completed the July 31 AEO/GEO upsell package and verified the client logo for the next presentation layer.

Primary goal

NEXT DECISION

Complete the paid-social handoff cleanly and establish the organic and AI-search baseline before expanding the next content sprint.

Source observed through

August 2, 2026**EXECUTIVE ANALYSIS**

July closed the paid-social lane responsibly instead of presenting historical delivery as an active program. The team recovered lead-routing evidence, repeatedly checked downstream disposition, and preserved the gap where exact individual outcomes were still unavailable.

At the same time, the growth strategy moved into an AEO, GEO, and SEO transition. The completed research brief, one-page offer, landing page, and email package give the organic program a concrete next step without implying that paid media is still running.

Platform evidence

Google, Meta, and other operating surfaces stay separate.

Meta Ads

Verified through Jul 25

Two campaigns recorded delivery in the confirmed source period. The leading campaign produced six lead-form results; July 26 remains outside the verified Meta source row.

Spend	Impressions	Lead-form results	Primary CPL	
\$478.14	10,563	6	\$56.75	
Workstream / campaign	State	Spend / scope	Delivery	Signal
Pittsburgh 25mi Lead Campaign - Copy	Delivered - handoff	\$340.48	8,310	6 lead forms
Primary First Optimized Lead Campaign	Delivered - now off	\$137.66	2,253	Outcome pending validation

AEO, GEO, and SEO

Transition active

The first organic lane is service-page answers, homeowner FAQs, local painting topics, and structured internal links. Baseline visibility is the next proof point.

Program status	Coordination	First lane	Baseline	
Initiated	Phil + Mac	Service + FAQ	Next review	
Workstream / campaign	State	Spend / scope	Delivery Signal	
Answer-ready service pages	Priority mapping	—	—	Baseline pending
Homeowner FAQ system	Question inventory	—	—	First sprint

Freshness and interpretation: Historical July Meta activity verified; handoff and AEO/GEO/SEO transition active. Counts and values are reproduced only where the source names the period and scope; missing fields remain pending.

Outcomes and measurement

Platform events are signals; business outcomes require reconciliation.

Platform signal

Six Meta lead-form results are the verified platform signal for the leading campaign.

Business outcome

Individual lead dispositions and qualified estimates were not fully reconciled in the reviewed July source window.

Measurement state

Conversion reporting is pending validation. Preserve the lead record and handoff history while organic baseline measurement is established.

Complete July delivery ledger

WORK COMPLETED · WHY IT MATTERS · STATE

Meta closeout	Completed the closed-loop lead correction packet and historical campaign review.	Preserves the six-form platform signal without calling it booked work.	Complete
Lead routing	Verified Meta lead routing and recovered delivery evidence.	Confirms where native lead records were expected to arrive.	Verified
Website lead	Performed a read-only website-lead verification and account-session check.	Separates website evidence from Meta form delivery.	Verified
Reconciliation	Built the lead reconciliation record and completed repeated disposition rechecks through July 29.	Documents what was known, duplicated, and still unresolved.	Open
Reporting	Built the July weekly performance dashboard using the verified source through July 25.	Provides a clean final paid-media handoff view.	Delivered
Organic strategy	Prepared the AEO, GEO, and SEO transition plan for service pages, FAQs, local topics, and internal links.	Defines the replacement growth lane.	Complete
Offer system	Created the July 31 research brief, one-page offer, landing page, and client email package.	Turns the transition strategy into a reviewable commercial package.	Ready

Decisions for August

Three owned next moves, written for action.

Wins

- The leading Meta campaign has a clear verified six-lead signal.
- The next growth lane is defined instead of leaving the account between strategies.

Watchouts

- Fagan is not in the current active paid-media roster as of July 30.
- The six leads are not presented as qualified estimates or booked work.
