Search, site architecture, and brand film

## REPORT STATUS

Deeper analysis and brand reel complete; implementation decisions pending

## JULY SIGNAL

July clarified the Hope Wellness growth path: tighten the search and conversion architecture, make the brand feel human, and queue the highest-impact site fixes before measurement expansion.

## What we completed in July

JULY RECAP

- Completed the deeper website and search analysis covering site architecture, conversion paths, content duplication, and local-search presentation.
- Produced a 15-item implementation queue: five P0, six P1, and four P2 items.
- Separated seven leadership decisions from the implementation backlog so approvals and production work are not conflated.
- Completed the 60-second vertical brand reel, 17-illustration visual library, and therapist video system.

## Primary goal

AUGUST PLAN

Convert the deeper analysis into an approved P0 implementation queue and confirm the measurement routes for search, booking, and GBP.

Next planning period

August 2026

## EXECUTIVE ANALYSIS

July created both the strategic diagnosis and the human-facing brand layer for Hope Wellness. The deeper analysis identified the site, search, conversion, duplication, booking, and local-search issues; the brand reel and visual direction made the recommended experience tangible.

The next constraint is implementation governance. The 15-item queue, seven leadership decisions, analytics access, booking ownership, and GBP visibility need to be resolved before the team can claim measurable search or booking improvement.

## Google search and local surfaces

Strategy review · platform access pending

The July work covered search architecture, conversion paths, content duplication, booking, and GBP questions. Exact Google Ads, GBP, ranking, and booking metrics were not available in the reviewed source window.

## Brand and content

Production complete

The brand reel and visual kit are finished for review. Content priorities now connect the identity work to the site and search implementation queue.

**July summary:** Deeper analysis and brand reel complete; implementation decisions pending.

# July results and work completed

Google conversion events count as leads; qualified business outcomes remain separate.

**Lead accounting:** Google Ads conversion events are counted as leads in this client-facing package. Lead counts are shown as whole integers; when Google reports fractional attribution, the display rounds to the nearest whole lead and preserves the raw value in the supporting note. Platform leads remain separate from qualified, booked, or revenue outcomes.

## Media results

No exact July Google or Meta delivery metric was verified for this report.

## Business results

Booking, GBP, search visibility, and implementation outcomes remain pending access, analytics, and client decisions.

## August reporting focus

Conversion reporting is pending validation. Release the P0 queue only after the measurement owner and destination paths are confirmed.

# August plan

Owned next steps, written for action.

## July highlights

- The work produced a prioritized 15-item implementation queue with five P0 actions.
- The completed brand reel and visual library give the client a reusable human-centered creative system.

## August focus

- No live Google or Meta account was mapped for July reporting.
- Implementation should not outrun measurement and booking-path confirmation.
