What we completed in July

JULY RECAP

- Mapped the appointment journey from ad click to form submission and booked consultation so August reporting can focus on the inquiries most likely to become appointments.
- Prepared the GA4 and appointment-tracking plan, including a clean submission ID and same-window appointment match.
- Built the Philadelphia Search replacement with stronger negative keywords, location controls, Search Partners review, and AI Max controls.
- Published the Meta Higher Intent form with SMS verification, four qualification questions, and four approved images.

Primary goal

AUGUST PLAN

Connect July leads to bridal appointments, improve the quality of incoming inquiries, and keep the strongest Philadelphia search and Meta traffic moving toward booked consultations.

Next planning period

August 2026

EXECUTIVE ANALYSIS

July generated eight total leads across Google and Meta while also improving the path from ad interaction to form submission and booked bridal consultation.

Google carried the larger reach and traffic load, while Meta introduced the new Higher Intent form with SMS verification and qualification questions. August will use appointment feedback to keep improving the strongest traffic and lead sources.

July summary: July Google and Meta results are complete; August focus is lead quality and bridal appointments.

July results and work completed

Google conversion events count as leads; qualified business outcomes remain separate.

Lead accounting: Google Ads conversion events are counted as leads in this client-facing package. Lead counts are shown as whole integers; when Google reports fractional attribution, the display rounds to the nearest whole lead and preserves the raw value in the supporting note. Platform leads remain separate from qualified, booked, or revenue outcomes.

Media results

Eight platform-reported leads: 1 Google Submit lead form conversion event plus 7 native Meta form leads. Meta also recorded 335 LPVs.

Business results

The August focus is connecting these eight leads to consultations so campaign decisions reflect appointment quality as well as lead volume.

August reporting focus

Google conversion events count as leads in this report. August reporting will connect each form submission to the appointment record using source and timestamp.
