REPORT STATUS

Google and Meta lead counts complete; appointment outcome validation pending

JULY SIGNAL

July produced eight platform-reported leads: one Google conversion event and seven Meta form leads. The channels now have distinct jobs, while appointment quality remains the decision point.

Google impressions

What moved in July

VERIFIED WORK

- Audited the appointment measurement path and identified the website Submit lead form action as needing attention.
- Produced the GA4 and appointment-measurement correction plan, QA cases, unique-ID specification, and same-window appointment crosswalk; live implementation remains pending validation.
- Built the Philadelphia Search replacement with negative-keyword, location, Search Partners, and AI Max controls; kept publishing decisions explicit.
- Published the Meta Higher Intent form with SMS verification, four qualification questions, and four approved images.

Primary goal

NEXT DECISION

Turn platform activity into verified bridal appointments by tying the lead-form and website actions back to the same-window appointment record.

Source observed through

August 2, 2026

EXECUTIVE ANALYSIS

July was not only a media-delivery month. The account work rebuilt the path from ad interaction to form submission and then to the appointment record, so Google and Meta could be judged against the same business question.

Google carried the larger reach and traffic load, while Meta introduced a higher-friction qualification step. The report counts one Google conversion event plus seven Meta form submissions as eight platform leads; the next decision should still use contacted and booked appointment quality.

Platform evidence

Google, Meta, and other operating surfaces stay separate.

Google Ads

Verified · exact July UI readback

The account delivered 35,258 impressions and 906 clicks on \$570.89. Google showed one Submit lead form conversion event, counted here as one Google lead. The action is marked Needs attention and is not treated as a verified appointment.

Spend	Impressions	Clicks	Google leads
\$570.89	35,258	906	1

Workstream / campaign	State	Spend / scope	Delivery	Signal
Philadelphia Search	Enabled	\$96.23	4,377	Campaign route active
Performance Max	Paused	\$474.65	30,881	1 Google lead

Meta Ads

Verified · native July campaign table

The July table showed seven Leads (Form) at \$7.37 per lead and 335 Landing Page Views at \$0.46 each. Spend was not surfaced in the current table readback, so it remains pending rather than inferred.

Form leads	Cost / form lead	Landing Page Views	Cost / LPV
7	\$7.37	335	\$0.46

Workstream / campaign	State	Spend / scope	Delivery	Signal
Qualified Form · Philadelphia	Active	Pending	Pending	7 Leads (Form)
Website Carousel · Philadelphia	Off	Pending	Pending	335 Landing Page Views

Freshness and interpretation: Google and Meta lead counts complete; appointment outcome validation pending. Counts and values are reproduced only where the source names the period and scope; missing fields remain pending.

Outcomes and measurement

Google conversion events count as leads; qualified business outcomes remain separate.

Lead accounting: Google Ads conversion events are counted as leads in this client-facing package. Lead counts are shown as whole integers; when Google reports fractional attribution, the display rounds to the nearest whole lead and preserves the raw value in the supporting note. Platform leads remain separate from qualified, booked, or revenue outcomes.

Platform signal

Eight platform-reported leads: 1 Google Submit lead form conversion event plus 7 native Meta form leads. Meta also recorded 335 LPVs.

Business outcome

Appointment, contacted, qualified, booked, and revenue outcomes were not reconciled in the reviewed July source window.

Measurement state

Google conversion events count as leads in this report. Appointment and revenue reporting remains pending validation; the next reliable join is lead event → form submission → appointment record, with source and timestamp retained.

Complete July delivery ledger

WORK COMPLETED · WHY IT MATTERS · STATE

Measurement	Built the Google conversion-tracking correction packet and appointment measurement plan.	Defines the event, deduplication, attribution, and validation rules without claiming live implementation.	Completed locally
Reconciliation	Created same-window reconciliation and appointment-crosswalk templates.	Makes platform events traceable to form and appointment records.	Ready
QA	Documented measurement test cases for duplicate events, missing IDs, and delayed appointment outcomes.	Prevents inflated or untraceable conversion reporting.	Complete
Search	Built and launched the Philadelphia Search replacement with location, negative-keyword, Search Partners, and AI Max controls.	Creates a cleaner high-intent acquisition lane.	Enabled
Meta form	Published a Higher Intent instant form with SMS verification and four qualification questions.	Adds lead-quality friction before agency follow-up.	Published
Creative	Prepared four approved images for the qualified-lead campaign.	Gives the form campaign a complete native creative set.	Complete
Reporting	Built the July weekly performance dashboard and Google-versus-Meta follow-up analysis.	Keeps channel roles and evidence gaps visible to the client.	Delivered

Decisions for August

Three owned next moves, written for action.

Wins

- Exact July Google account readback is now available.
- Meta qualification moved from a generic lead path to a Higher Intent form.

Watchouts

- The Google website form action is flagged Needs attention.
- Native Meta spend was not exposed in the July table readback; do not back-solve it from CPL.
