EXECUTIVE ANALYSIS

July converted an SEO and AI concept into a complete Phase Two growth proposal. The final package integrated organic search, Google Grants, social, cold email, webinar promotion, and ChatGPT Ads under a single Momentum Digital narrative.

The commercial logic and presentation QA are complete. The remaining work is not more document production; it is client approval of the scope, pilot sequence, owners, and measurement contract.

July summary: Proposal and QA complete; one Google lead observed in the selected account; client approval remains open.

July results and work completed

Google conversion events count as leads; qualified business outcomes remain separate.

Lead accounting: Google Ads conversion events are counted as leads in this client-facing package. Lead counts are shown as whole integers; when Google reports fractional attribution, the display rounds to the nearest whole lead and preserves the raw value in the supporting note. Platform leads remain separate from qualified, booked, or revenue outcomes.

Media results

The selected Google account recorded one conversion event, counted here as one Google lead, alongside \$120 spend, 3.37% CTR, and \$8.54 average CPC.

Business results

No client-approved Phase Two scope, grant outcome, or downstream growth result was verified in the July source window.

August reporting focus

Google conversion events count as leads. Any Google Grants outcome reporting remains pending validation until the grant route, goals, and reporting owner are approved.
