

Omega Landscaping and Concrete

Google Ads, GBP content, and lead reconciliation

REPORT STATUS

Full-July Google lead total verified; identity and quality remain the decision layer

JULY SIGNAL

Omega recorded five Google leads in the exact July 1–31 account view: two calls from ads and three form submissions. Lead identity remains the next decision layer.

What we completed in July

JULY RECAP

- Reviewed the Colorado Springs Performance Max account and the smaller high-intent Search row without overstating its creation date.
- Built the qualified-opportunity tracking file and published Google lead-form asset 400863777374 with the More qualified setting.
- Verified four Google Business Profile posts live and produced a second four-post creative package whose publication remains pending verification.
- Documented the Standard-role limitation blocking automatic Zapier and Sheets lead export.

Primary goal

AUGUST PLAN

Tie Google-counted events to named calls, forms, inbox records, and qualified projects before changing budget or rebuilding Search.

Next planning period

August 2026

EXECUTIVE ANALYSIS

July kept Omega's paid program concentrated in Colorado Springs while building the measurement and local-proof systems around it. Performance Max carried nearly all delivery; the high-intent Search row remained a small structural test.

The work outside delivery matters just as much: a qualified-opportunity tracking file, a published qualified lead-form asset, four verified-live GBP posts, and a second four-post package now provide the evidence framework needed before budget changes.

Channel performance

July activity and results by channel.

Google Ads

Verified · exact July UI readback

The account delivered 23,552 impressions and 697 clicks on \$1,473.45 across both campaigns that spent, for a \$2.11 blended CPC. The exact conversion-action breakdown recorded five Google leads: two Calls from ads and three Form Submission events. No Get Directions Click action row was recorded.

Spend	Clicks	Blended CPC	Google leads
\$1,473.45	697	\$2.11	5

Workstream / campaign	State	Spend / scope	Delivery	Signal
Colorado Springs · Performance Max	Paused	\$1,460.13	23,503 impressions	694 clicks · 5 leads
High-intent Search	Enabled	\$13.32	49 impressions	3 clicks · 0 direction actions
Qualified lead-form asset	Published · under review	—	Asset 400863777374	More qualified

Google Business Profile

Four live · four produced

The July 14–20 batch was verified live. The July 24–30 package was produced and scheduled, but the canonical README does not prove all four posts published.

Verified live posts	Additional produced	Market	Outcome state
4	4	Colorado Springs	Pending validation

Workstream / campaign	State	Spend / scope	Delivery	Signal
Jul 14–20 batch	Verified live	—	4 posts	Driveway, turf, spotlight, drainage
Jul 24–30 batch	Produced	—	4 graphics	Walls, details, patio, design

July summary: Full-July Google lead total verified; identity and quality remain the decision layer.

July results and work completed

Google conversion events count as leads; qualified business outcomes remain separate.

Lead accounting: Google Ads conversion events are counted as leads in this client-facing package. Lead counts are shown as whole integers; when Google reports fractional attribution, the display rounds to the nearest whole lead and preserves the raw value in the supporting note. Platform leads remain separate from qualified, booked, or revenue outcomes.

Media results

Google conversion events count as leads: five Google leads were recorded in the exact July 1–31 account view, comprising two calls from ads and three form submissions.

Business results

Named lead, qualified project, booked work, and revenue reconciliation remains pending.

August reporting focus

Google-reported leads are validated as platform lead counts. Qualified-project and revenue reporting remains pending validation; use the qualified-opportunity tracking file and source-specific call/form review before optimization.

Work completed in July

WORK COMPLETED · WHY IT MATTERS · STATE

Paid media	Reviewed the Colorado Springs Performance Max and high-intent Search campaign rows.	Defines the exact account structure without overstating creation timing.	Verified
Measurement	Completed the qualified-lead reconciliation correction packet.	Defines how calls, forms, inbox records, and opportunities should join.	Complete
Lead tracking	Built the qualified-opportunity tracking file for named outcome review.	Moves optimization toward project quality rather than event volume.	Ready
Lead form	Published Google lead-form asset 400863777374 using the More qualified setting.	Adds service-fit information before follow-up.	Published · under review
GBP batch 1	Verified four posts live: driveway, turf, project spotlight, and drainage.	Builds public local service and project proof for Colorado Springs.	Verified live
GBP batch 2	Produced retaining-wall, landscape-detail, patio-planning, and landscape-design graphics.	Extends the repeatable local content rhythm; publication remains unverified.	Produced
Lead export	Documented the Standard-role limitation blocking automatic Zapier and Sheets export.	Explains why downstream automation could not be completed.	Blocked
Reporting	Reconciled the exact July 1–31 Google Ads view.	Establishes five full-month Google leads: two calls from ads and three form submissions.	Verified
Landing path	Reviewed service clarity, project proof, and form routing on the acquisition path.	Prepares the account for lead-quality-based optimization.	Reviewed

August plan

Owned next steps, written for action.

July highlights

- The account remains concentrated in the intended active campaign.
- GBP production now has a reusable project-proof rhythm.

August focus

- The five Google leads still need named call and form reconciliation.
- Google-reported leads are not a proxy for qualified landscaping work.
