

Omega Landscaping and Concrete

Google Ads, GBP content, and lead reconciliation

REPORT STATUS

Google lead evidence complete for two verified July windows; identity and quality remain the decision layer

JULY SIGNAL

Omega recorded 13 Google leads through the July 16 evidence window and 1 Google lead in the July 20–26 readback. The report keeps those windows separate while lead identity remains the next decision layer.

What moved in July

VERIFIED WORK

- Reviewed the Colorado Springs Performance Max account and the smaller high-intent Search row without overstating its creation date.
- Built the qualified-opportunity ledger and published Google lead-form asset 400863777374 with the More qualified setting.
- Verified four Google Business Profile posts live and produced a second four-post creative package whose publication remains pending verification.
- Documented the Standard-role limitation blocking automatic Zapier and Sheets lead export.

Primary goal

NEXT DECISION

Tie Google-counted events to named calls, forms, inbox records, and qualified projects before changing budget or rebuilding Search.

Source observed through

August 2, 2026

EXECUTIVE ANALYSIS

July kept Omega's paid program concentrated in Colorado Springs while building the measurement and local-proof systems around it. Performance Max carried nearly all delivery; the high-intent Search row remained a small structural test.

The work outside delivery matters just as much: a qualified-opportunity ledger, a published qualified lead-form asset, four verified-live GBP posts, and a second four-post package now provide the evidence framework needed before budget changes.

Platform evidence

Google, Meta, and other operating surfaces stay separate.

Google Ads

Verified · exact July UI readback

The account delivered 23,552 impressions and 697 clicks on \$1,473.45. Google conversion events count as leads: evidence recorded 13 leads through July 16 and 1 lead in the July 20–26 readback. The windows remain separate. Lead-form asset 400863777374 was published July 29 and remained under review.

Spend	Impressions	Clicks	Lead windows
\$1,473.45	23,552	697	13 + 1

Workstream / campaign	State	Spend / scope	Delivery	Signal
Colorado Springs · Performance Max	Active	\$1,460.13	Pending	694 clicks
High-intent Search	Active	\$13.32	Pending	3 clicks
Qualified lead-form asset	Published · under review	—	Asset 400863777374	More qualified

Google Business Profile

Four live · four produced

The July 14–20 batch was verified live. The July 24–30 package was produced and scheduled, but the canonical README does not prove all four posts published.

Verified live posts	Additional produced	Market	Outcome state
4	4	Colorado Springs	Pending validation

Workstream / campaign	State	Spend / scope	Delivery	Signal
Jul 14–20 batch	Verified live	—	4 posts	Driveway, turf, spotlight, drainage
Jul 24–30 batch	Produced	—	4 graphics	Walls, details, patio, design

Freshness and interpretation: Google lead evidence complete for two verified July windows; identity and quality remain the decision layer. Counts and values are reproduced only where the source names the period and scope; missing fields remain pending.

Outcomes and measurement

Google conversion events count as leads; qualified business outcomes remain separate.

Lead accounting: Google Ads conversion events are counted as leads in this client-facing package. Lead counts are shown as whole integers; when Google reports fractional attribution, the display rounds to the nearest whole lead and preserves the raw value in the supporting note. Platform leads remain separate from qualified, booked, or revenue outcomes.

Platform signal

Google conversion events count as leads: 13 Google leads were recorded through the July 16 evidence window and 1 Google lead in the July 20–26 readback. The windows remain separate rather than being presented as a full-month total.

Business outcome

Named lead, qualified project, booked work, and revenue reconciliation remains pending.

Measurement state

Google-reported leads are validated as platform lead counts. Qualified-project and revenue reporting remains pending validation; use the qualified-opportunity ledger and source-specific call/form review before optimization.

Complete July delivery ledger

WORK COMPLETED · WHY IT MATTERS · STATE

Paid media	Reviewed the Colorado Springs Performance Max and high-intent Search campaign rows.	Defines the exact account structure without overstating creation timing.	Verified
Measurement	Completed the qualified-lead reconciliation correction packet.	Defines how calls, forms, inbox records, and opportunities should join.	Complete
Lead ledger	Built the qualified-opportunity ledger for named outcome review.	Moves optimization toward project quality rather than event volume.	Ready
Lead form	Published Google lead-form asset 400863777374 using the More qualified setting.	Adds service-fit information before follow-up.	Published · under review
GBP batch 1	Verified four posts live: driveway, turf, project spotlight, and drainage.	Builds public local service and project proof for Colorado Springs.	Verified live
GBP batch 2	Produced retaining-wall, landscape-detail, patio-planning, and landscape-design graphics.	Extends the repeatable local content rhythm; publication remains unverified.	Produced
Lead export	Documented the Standard-role limitation blocking automatic Zapier and Sheets export.	Explains why downstream automation could not be completed.	Blocked
Reporting	Built the July weekly performance dashboard and separated unlike reporting windows.	Keeps the 13-lead and 1-lead snapshots visible without presenting them as one full-month total.	Delivered
Landing path	Reviewed service clarity, project proof, and form routing on the acquisition path.	Prepares the account for lead-quality-based optimization.	Reviewed

Decisions for August

Three owned next moves, written for action.

Wins

- The account remains concentrated in the intended active campaign.
- GBP production now has a reusable project-proof rhythm.

Watchouts

- The 13-lead and 1-lead readings cover different July windows.
- Google-reported leads are not a proxy for qualified landscaping work.

Next moves

OWNER · TIMING · IMPACT

01	Identify Match July events to calls, forms, inbox, and CRM records	Dillon + Omega This week
02	Publish Release the approved GBP batch with exact service and project captions	Content Next 7 days
03	Decide Change budget only after project quality is visible	Paid media After reconciliation
