

Replenish / 7-Eleven

Google Ads, location pacing, and billing reconciliation

REPORT STATUS

Replenish-only Google lead count complete; billing and event-category reconciliation remain open

JULY SIGNAL

July produced 13 Google-reported leads across the Replenish-only rows while the operating work tightened caps, location isolation, and billing evidence. Lead categories and business outcomes remain the next reconciliation layer.

What moved in July

VERIFIED WORK

- Reviewed Replenish-only July rows and kept Fresh Blends / Kwik Trip excluded from the totals.
- Launched and monitored San Diego location campaigns for Solana Beach, Miramar, Torrey Del Mar, and Carmel Mountain.
- Verified lifetime-cap pause behavior, location isolation, CPC pacing, and campaign-row sums in the weekly reporting packet.
- Completed the July 29 balance reconciliation: gross costs, credits, retained payments, chargebacks, and the remaining confirmation questions.

Primary goal

NEXT DECISION

Keep location pacing and billing decisions grounded in the verified Replenish rows, not blended account totals or ambiguous event labels.

Source observed through

August 2, 2026

EXECUTIVE ANALYSIS

July was a location-operations month as much as a media month. The work covered account isolation, location assets, San Diego campaign launches, lifetime caps, clicked-direction modeling, creative readiness, and a full billing reconciliation.

The delivery totals are useful, but the decision risk sits in mixed action definitions and unresolved billing questions. The report therefore keeps Purchase, Get directions, Page view, modeled directions, chargebacks, and actual store outcomes in separate evidence lanes.

Platform evidence

Google, Meta, and other operating surfaces stay separate.

Google Ads

Verified · Replenish-only exact July rows

Replenish rows totaled 125,127 impressions, 4,301 clicks, 3.44% CTR, and \$1,966.90. The account summary showed 13 Google conversion events across Purchase, Get directions, and Page view configuration. All 13 count as Google leads in this package; the categories are not represented as confirmed purchases or store visits.

Spend	Impressions	Clicks	Google leads
\$1,966.90	125,127	4,301	13

Workstream / campaign	State	Spend / scope	Delivery	Signal
Miami / Coral Springs / Pampano / Boca	Paused	Included	Included	July rows
Torrey / Miramar / Carmel / Solana	Enabled	Included	Included	July rows

Location and billing controls

Reviewed in July

The weekly source also showed 69 modeled clicked directions for Jul 20–26. That model is displayed separately from Google leads and from business outcomes. Billing reconciliation remains open around four chargebacks and credit allocation.

Modeled directions	Modeled window	Chargebacks	Billing state
69	Jul 20–26	4	Pending confirmation

Workstream / campaign	State	Spend / scope	Delivery	Signal
San Diego launch	Reviewed	\$93.47	4 campaigns	Location QA
Balance reconciliation	Open	Pending	4 chargebacks	Credit allocation

Freshness and interpretation: Replenish-only Google lead count complete; billing and event-category reconciliation remain open. Counts and values are reproduced only where the source names the period and scope; missing fields remain pending.

Outcomes and measurement

Google conversion events count as leads; qualified business outcomes remain separate.

Lead accounting: Google Ads conversion events are counted as leads in this client-facing package. Lead counts are shown as whole integers; when Google reports fractional attribution, the display rounds to the nearest whole lead and preserves the raw value in the supporting note. Platform leads remain separate from qualified, booked, or revenue outcomes.

Platform signal

Google showed 13 conversion events in the Replenish-only summary, counted here as 13 Google leads. The 69 clicked-directions figure is modeled from verified clicks for Jul 20–26 and remains separate from the lead total.

Business outcome

Store visits, purchases, and revenue were not reconciled to the July Google leads in the reviewed source window.

Measurement state

Google conversion events count as leads. Purchase, Get directions, Page view, modeled directions, and business outcomes remain separately labeled while downstream reporting is validated.

Complete July delivery ledger

WORK COMPLETED · WHY IT MATTERS · STATE

Account control	Kept Replenish rows separate from Fresh Blends inside the shared child account.	Protects client-level spend and delivery totals.	Verified
Location system	Built the location-isolation matrix and location-asset correction packet.	Reduces cross-store geography and asset leakage.	Complete
Creative	Prepared the Miami location asset draft and reviewed content and creative approval readiness.	Creates a controlled asset path for expansion locations.	Ready
San Diego launch	Launched and reviewed Solana Beach, Miramar, Torrey Del Mar, and Carmel Mountain campaigns.	Adds four named locations with explicit QA coverage.	Reviewed
Pacing	Verified CPC pacing, lifetime-cap pause behavior, and row-level campaign sums.	Prevents delivery beyond intended ceilings.	Complete
Reporting	Built the weekly performance presentation and updated clicked-directions review slides.	Separates modeled direction activity from native events.	Delivered
Billing	Completed the July billing audit and four-page balance reconciliation package.	Surfaces gross cost, credits, payments, chargebacks, and open confirmations.	Open
Decision support	Documented four chargebacks and the remaining credit-allocation questions.	Defines the exact billing decisions still required.	Pending

**\$2,148.43
displayed
balance**

July 29 account reconciliation

The displayed balance is not presented as the final payable amount; credit allocation and chargeback intent still require confirmation.

\$6,102.69 gross campaign cost \$558.78 credits and adjustments \$3,395.48 retained payments 4 chargebacks · \$1,942.67

Decisions for August

Three owned next moves, written for action.

Wins

- Replenish and Fresh Blends remain separate despite the shared child account.
- The July billing packet makes the open confirmation questions explicit.

Watchouts

- The 13 Google leads use mixed action definitions.
- The final payable amount and chargeback intent still require confirmation.
