

Omega Landscaping and Concrete

Google Ads, estimate destination, and local proof

REPORT STATUS

High-intent Search reviewed;
estimate destination published

WEEKLY SIGNAL

Omega's weekly read captured two reported Google conversions alongside a published estimate destination and a continuing local-proof rhythm. The next decision is project quality, not a larger blended total.

What we completed this week

WEEKLY
READ

- Delivered the Aug 3 weekly report with the current Google lane and local work separated.
- Published the dedicated Omega estimate destination on August 5 with form measurement and campaign parameters preserved.
- Reviewed the High Intent Search lane read only and left the Display Expansion recommendation unapplied.
- Carried forward the Google Business Profile project-proof rhythm and its next creative release.

Primary goal

NEXT ACTION WINDOW

Match the two reported conversions and any calls or forms to named inquiries and project status before changing budget or campaign settings.

Next planning period

August 2026

EXECUTIVE ANALYSIS

The weekly signal is a usable combination of two reported conversions, 56 clicks, and a live estimate destination. The page release gives future traffic a clearer place to become an inquiry.

Reported conversions still need named-lead and project-quality reconciliation. That join is more decision-useful than changing the campaign from the dashboard signal alone.

Channel performance

Aug 3 to Aug 9 activity and results by channel.

Google Ads

Active · weekly read

The current read recorded two reported conversions, 1,050 impressions, 56 clicks, and \$387.83 in High Intent Search spend. The Display Expansion suggestion was not applied.

Conversions	Clicks	Spend	CTR
2	56	\$387.83	5.34%

Workstream / campaign	State	Spend / scope	Delivery	Signal
High Intent Search	Active	\$387.83	56 clicks	2 reported conversions
Optimization suggestion	Held	—	—	Not applied

Estimate destination

Published · Aug 5

The dedicated estimate page went live with form action, tags, and campaign-parameter handling verified in the release record.

Status	Form	Tags	Next
Published	Wired	Verified	Lead join

Workstream / campaign	State	Spend / scope	Delivery	Signal
Omega estimate page	Published	—	Form route	Parameters preserved
Project quality	Pending	—	—	CRM join next

Weekly summary: High-intent Search reviewed; estimate destination published.

Weekly results and work completed

Weekly evidence is separated from downstream business outcomes.

Lead accounting: Platform-reported lead events are shown as whole integers where a current platform read was authorized. Platform activity remains separate from qualified inquiries, booked work, revenue, and other downstream outcomes. Unavailable fields remain pending validation.

Media results

The weekly Google read recorded two reported conversions, 56 clicks, 1,050 impressions, and \$387.83 in spend.

Business results

Named inquiries, qualified projects, booked work, and revenue were not reconciled in the current platform read.

Next reporting focus

Match the two reported conversions and any calls or forms to named inquiries and project status before using the signal to guide budget.

Work completed Aug 3 to Aug 9

WORK COMPLETED · WHY IT MATTERS · STATE

Report	Delivered the weekly report with paid and local lanes separated.	Keeps current evidence and prior production legible in one read.	Delivered
Landing page	Published the dedicated estimate destination and verified its form route.	Gives current search traffic a clean inquiry destination.	Published
Search	Reviewed High Intent Search and held the Display Expansion suggestion.	Keeps the account decision tied to the approved scope.	Read only
Lead quality	Held named-inquiry and project-status matching as the next step.	Moves the account from platform activity toward opportunity quality.	Next

August plan

Owned next steps, written for action.

Weekly highlights

- The estimate destination is live and wired.
- The current Search signal is measurable without an unapproved recommendation being applied.

August focus

- Match reported conversions to named inquiries and project status.
- Continue the local proof rhythm and review Search quality by service and location.

Planned next steps

OWNER · TIMING · IMPACT

01	Reconcile Match current events to calls, forms, inbox, and project records	Dillon + Omega Next read
02	Publish Release the next approved local-proof batch	Content Weekly
03	Decide Use project quality before changing budget	Paid media After reconciliation
