VERDICT

Alert fired (marketing pipeline, not site health). Our largest organic-sourced opportunity, Kaiser Permanente (\$125K, "Expressing Interest" at the last run), was marked closed-lost, which collapsed marketing-influenced open pipeline from \$140K to \$15K. The close looks premature or mistaken: the close date is set two months out (2026-09-30), the amount was zeroed to \$0, and no loss reason was logged, so it should be reviewed and likely reopened. Site health is otherwise steady, but note the yesterday-was-the-best-day read from the morning run was wrong once submissions are itemized: two of the five were pollution (a Codex QA test and, early today, a spam bot).

ALERTS FIRED

- ALERT**

Influenced open pipeline dropped 89% (\$140K to \$15K) [threshold: >50% MoM drop]. Cause is a single deal: Kaiser Permanente (Organic Search, \$125K) moved from open to closed-lost since the last run. The only marketing-sourced deal still open is RPM xConstruction (\$15K, presentation scheduled).
- ALERT**

Premature/erroneous close, data integrity: Kaiser Permanente is now closed-lost but carries a future close date (2026-09-30), a \$0 amount, and no loss reason. Same anomaly pattern as Superior Propane and Eat'n Park. Human-review item (reopen if still live), not a site fix. No site-health thresholds tripped: no WoW view breach, no zero-submission streak, /404 not in the top pages, daily views non-zero, conversion above floor.

Visit-to-lead conversion (July)	1.69%	above floor	
Marketing-influenced open pipeline	\$15,000	down from \$140,000	
Lead follow-up gap (no outreach)	78/185 = 42%	above 35% threshold	

SEO SWEEP (DAILY)

- **Legacy apex URL still indexed:** `alignhcm.com/news/` appears in Google's index. It should 301 to the current news/blog path on `www`. Redirect is believed live; the index entry is cached. Monitoring (open issue).
- **Duplicate content path:** both `/success-stories` and `/case-studies` are live and indexed for the same case-study content. Pick one canonical path and 301 the other, or set a canonical tag, to avoid splitting ranking signal. New this sweep; worth a 10-minute canonical decision.
- Core commercial pages all indexed and titled correctly (home, /about, /services, /services/support, /services/assessments-strategic-engagements, /careers, /blog). No `/welcome/` legacy URL, no missing key page, no title mismatch.
- Blog duplicate-title scan: clean. The "Most HCM Platforms Add AI Features" pair have distinct titles and slugs; the talent-mobility pair (`/beyond-hiring-...` vs `/the-case-for-internal-talent-mobility`) is near-duplicate content and should get a canonical when touched.

OPEN ISSUES

- hubspot-sitemap-cache-stale-redirects (2 healthy 301s remain in the HubSpot sitemap cache; no private-token sitemap write endpoint)
- duplicate-case-study-path (`/success-stories` and `/case-studies` both live and indexed for the same content; pick one canonical path and 301 the other, or set a canonical tag; found in daily SEO sweep 2026-07-23)

ONE HIGHEST-LEVERAGE ACTION TODAY

Have sales confirm the Kaiser Permanente close today. A \$125K organic-sourced deal flipping to closed-lost with a future close date and a zeroed amount is more likely a stage/data error than a genuine loss, and it is our biggest marketing-influenced opportunity of the year. If it is still live, reopen it and fix the close date; if it is truly lost, log the reason. Either way it is the highest-leverage 10 minutes available today.
