Weekly progress report

Sep 1 to Sep 8, 2026

A closer look at the work completed, the evidence available, and the priorities ahead.

REMOVE FRICTION. REVIEW LEAD QUALITY.

The paid-search review removed a keyword conflict and documented a substantial Ad Rank constraint for further review. Organic reporting carried forward the Fairfield pages and schema work completed in August. The September 11 client call is now scheduled, with lead quality, connected calls and accepted forms as the main measurement priorities. The current Google Ads window recorded only five impressions, so the report keeps delivery volume and business outcomes distinct.

The actions below separate verified changes, reported progress and work awaiting review.

Ad Rank constraint investigated

The diagnostic review found 74.07% Search impression share lost to rank across the inspected eighteen-keyword view. The \$2 maximum CPC limit was identified as a candidate constraint, not a proven cause. The \$7 daily budget and bid settings were unchanged.

Defines a focused follow-up without claiming a bid increase has already solved delivery.
