VERDICT

Steady, no alerts fired. The weekend was quiet as expected for a B2B site (44 views across Sat and Sun, zero conversions), and the week's real activity was Friday Jul 24 at 66 views with 4 leads. Influenced open pipeline is unchanged at \$15K because Kaiser Permanente is still sitting closed-lost and has not been reopened yet, so that reopen remains the top standing action.

SEO SWEEP (DAILY)

- New page indexed (good):** /dayforce-implementation ("Solutions | Dayforce Implementation") now appears in Google's index, a fresh solutions landing page. No action needed; monitor it for tracking + CTA coverage on the next full crawl.
- Legacy apex URL still indexed:** alignhcm.com/news/ remains in the index (cached; redirect believed live). Monitoring.
- Duplicate content path:** /success-stories and /case-studies both still live and indexed for the same content. Pick one canonical path and 301 the other. Open issue, unchanged.

OPEN ISSUES

- hubspot-sitemap-cache-stale-redirects (2 healthy 301s remain in the HubSpot sitemap cache; no private-token sitemap write endpoint)
- duplicate-case-study-path (/success-stories and /case-studies both live and indexed for the same content; pick one canonical path and 301 the other, or set a canonical tag; found in daily SEO sweep 2026-07-23)

- Core commercial pages indexed and titled correctly (home, /about, /services, /services/support, /careers, /blog). No /welcome/ legacy URL, no missing key page, no title mismatch.

ONE HIGHEST-LEVERAGE ACTION TODAY

Reopen Kaiser Permanente or log its loss reason. It has now been sitting closed-lost with a future close date and a zeroed amount since last week, still our biggest marketing-influenced opportunity of the year, and every day it stays mislabeled the pipeline number understates reality. This is the same 10-minute action carried from Thursday and it is still the highest-leverage move.
