

CASE STUDY

Connected Systems. Real-Time Data. Better Outcomes.

How Align HCM connected a nonprofit's disconnected enterprise systems with API-driven integration, so the mission gets the data, not the manual work.

INDUSTRY

Nonprofit & Human Services

FOOTPRINT

Pennsylvania

ENGAGEMENT

Systems integration

// THE CHALLENGE

Disconnected Systems, Duplicated Work

SILOED PLATFORMS

- HR and care systems ran independently
- No real-time data sharing
- Each system its own island

MANUAL BURDEN

- Redundant duplicate data entry
- Delayed employee onboarding
- Errors from rekeyed records

BLIND SPOTS

- No unified view for leadership
- Decisions made on stale data
- Service delivery insights locked away

// HOW ALIGN HCM HELPED

API-Driven Integration, Owned In-House

1

Connect

Built API-driven, real-time integration between the HR and care platforms.

2

Automate

Employee records and medication administration now update automatically.

3

Enable

Documentation that lets InVision's IT team manage and expand integrations independently.

Real-time connectivity . Zero rekeying . In-house ownership

// THE RESULTS

Immediate & Lasting Impact

2

Real-Time Sync

Records update across systems the moment they change.

Manual Entry Eliminated

Duplicate data entry and its errors are gone.

Actionable Insight

Leadership sees unified data; more integrations underway.

“

“Working with Align was a great experience. In fact, I was so impressed with Align that I went to my other teams to see how they could help.”

Gary Boughamer, Director of Property & Technology Services, InVision Human Services

InVision Human Services is a Pittsburgh-based nonprofit serving individuals with special needs across Pennsylvania through personalized support plans, in-home assistance, community programs, and behavioral health services.

Your HCM platform should work for you. **Not the other way around.**
