First-party HubSpot content analytics & CRM · reporting window 2026-01-01 to 2026-08-01

VERDICT

Steady and improving, no new alerts. Two good things: the influenced-open-pipeline alert from Jul 23 has cleared (it recovered from \$15K to about \$416K on a new \$400K Direct-sourced deal, Diversified Energy), and July closed as the strongest month since January at 2,262 views and 45 submissions. Two items still need a human hand: Kaiser Permanente is still individually marked closed-lost even though the Edge pass fixed the stage misconfiguration that caused it, and HubSpot's GA4 integration is pointed at an invalid measurement ID.

ALERTS FIRED

CLEAR

No alerts fired. All thresholds within range.

LEADING INDICATORS & DATA INTEGRITY

Visit-to-lead conversion (July)	1.99%	above floor
Marketing-influenced open pipeline	\$416,056	up from \$15,000
Lead follow-up gap (no outreach)	84/200 = 42%	above 35% threshold
Closed-lost without a reason	85 deals · \$13,755,343	100% of lost

OPEN ISSUES

- hubspot-sitemap-cache-stale-redirects (2 healthy 301s remain in the HubSpot sitemap cache; no private-token sitemap write endpoint)
- duplicate-case-study-path (/success-stories and /case-studies both live and indexed for the same content; pick one canonical path and 301 the other, or set a canonical tag; found in daily SEO sweep 2026-07-23)
- ga4-invalid-id-in-hubspot (HubSpot GA4 integration field holds G-320235048, an invalid measurement ID firing into a non-existent property; the real live stream is G-0Y6LQTTBRJ; Edge audit 2026-07-30; awaiting Dillon: repoint or uncheck)
- duplicate-ga4-firing (theme includes align-attribution.min.js twice around the global footer, so G-0Y6LQTTBRJ fires twice per pageview; needs a dev to remove one include; Edge audit 2026-07-30)
- cta-form-missing-attribution-fields (footer CTA form e733d928 posts only name/email/phone/company/service_interest/message, so the 33 Align attribution properties sit at ~0% fill; add align_* fields to the payload; Edge audit 2026-07-30)

ONE HIGHEST-LEVERAGE ACTION TODAY

Two 10-minute human actions, in order: (1) reopen Kaiser Permanente (move it out of closed-lost back to an open stage and restore its amount), and (2) decide the GA4 integration field, uncheck it so HubSpot stops firing into the invalid [G-320235048](#) . Both are recorded in the Edge handoff; neither needs code. The pipeline recovery and strong July close mean nothing else is urgent today.
