

NEXLA

Weekly progress report

Sep 1 to Sep 8, 2026

A closer look at the work completed, the evidence available, and the priorities ahead.

A FOCUSED LAUNCH, WITH MEASUREMENT NEXT.

The launch concentrated Google Ads into Brand Exact and a focused MCP Search campaign. The September 8 review checked all thirty-six campaigns and confirmed two enabled campaigns with combined average daily budgets of \$65.75. The September 1 to 8 account total was \$373.42, 142 clicks and 15,141 impressions, including historical activity in campaigns now paused. Conversion-goal alignment and accepted-form testing remain open; a staged tracking listener is not yet a verified live conversion path.

The actions below separate verified changes, reported progress and work awaiting review.

Work reviewed Sep 1 to Sep 8, 2026

Evidence reviewed Sep 8

Prepared by Momentum 360

WHAT MOVED FORWARD

Specific actions, deliverables and decisions, with their evidence status.

Sep 3

Client granted Google Ads account access

Verified work /
decision

Google Ads notifications confirmed a new user was invited by the client-side contact and then successfully added as a Standard user on the Nexla account.

Account access was the gating dependency for launch; this is what unblocked it the same day.

Gmail · 2026-09-03

Sep 3

Focused two-campaign launch reported

Reported
complete

The launch update retained Brand Exact at \$25 per day and launched focused MCP Search at \$40.75 per day, with all other campaigns paused. The update recorded Search-only targeting, the United States, and a weekday 7 a.m. to 7 p.m. Central schedule for MCP.

Creates a defined brand and nonbrand test within the approved approximate \$2,000 monthly budget.

Launch update · 2026-09-03

Sep 4

Campaign state and actual conversion goal reviewed

Verified work /
decision

The live review independently found the two enabled campaigns and the \$65.75 daily-budget total. Both used a custom CRM lifecycle Lead goal, rather than a confirmed demo-request goal. Brand bid toward that goal; MCP used Maximize Clicks. Import reporting needed reconciliation.

Prevents a configured CRM stage from being presented as a verified demo or qualified lead.

Project evidence · 2026-09-04

Sep 5

Form listener and spam guard tested in a staged preview

Reviewed /
prepared

The staged preview passed its listener and spam-guard checks. A test using a Gmail address was rejected by the form, so an accepted business-email submission and resulting lead record were not established. Production publication and live conversion success remain unverified.

Moves implementation forward while keeping the remaining end-to-end test explicit.

Project evidence · 2026-09-05

Sep 8

All thirty-six campaign rows reconciled

Verified work /
decision

A fresh authenticated review placed all thirty-six campaigns in one table and reconciled every row to the September 1 to 8 account total. MCP Search and Brand Exact were enabled; the other thirty-four campaigns were paused.

Provides a complete account read instead of extrapolating from one visible table page.

Project evidence · 2026-09-08

WHAT THE DATA SHOWS

Each channel keeps its own dates, attribution and collection time.

\$373.42	15,141	142	\$2.63
Spend	Impressions	Clicks	Average cost per click

Delivery at collection: Enabled: 2 campaigns. Account timezone: America/Chicago. Period activity may precede a pause. Conversion reporting is pending validation. September 8 is a partial day through the collection time shown. Google Ads reporting is not real time. Scope: Account total, all 36 campaign rows read; includes historical activity in now-paused campaigns.

Campaign	Impressions	Clicks	Spend
G_US_S_NB_MCP-Agentica Enabled	2,907	79	\$296.86
G_US_PMAX_NB_MCP-Agentica Paused	11,810	47	\$34.07
G_US_S_Brand_Exact Enabled	69	15	\$31.06
G_US_S_NB_ETL-Pipeline Paused	354	1	\$11.43
G_US_S_NB_Governance Paused	1	0	\$0.00

WHERE WE GO NEXT

The priorities supported by this period's work and account decisions.

Agree the primary conversion and valid-lead criteria

Reconcile demo requests, CRM lifecycle Lead imports and the intended optimization target with the client.

Momentum 360

Complete an accepted form test

Use an approved business-email test and verify submission, lead creation and the intended event before releasing the staged listener.

Momentum 360

Review search terms and qualified outcomes

Monitor the focused campaign and brand separately,
then use verified lead quality to inform any expansion.

Momentum 360

DECISIONS & DEPENDENCIES

Sep 3

Launch at \$65.75 per day total, Brand Exact protected and a single focused MCP Search campaign, all other campaigns paused.

EVIDENCE, CLEARLY DATED.

Prepared from a September 8 review of dated account communications, available project artifacts and relevant working-session records. Platform figures below are independently dated.

Work discussed during the period can relate to an earlier deliverable. Those cases are labelled. Channel results retain their own reporting window and collection date; visits, platform events and business outcomes are separate measures.

Source links and personal contact details remain in the private evidence file. This report contains only this client's work and results.

Keep the work moving.
